

ECF Filing BUG:

When filing an event that adds an attorney to a case for multiple parties (more than 2), the docket text is incomplete in that it does not show all the parties selected. This affects the docket text only (it does not affect the filers; the filers have been added properly). This can be confusing and concerning in that you may not think the attorney was added correctly. Please do not go back and try to add the attorney again. If this is done you will receive this error message "WARNING! The name you entered matches an attorney name that already exists in the database. A new person has been created." Now, even if filers aborts this entry, the new attorney is in the database twice now. Please feel free to call the ECF Helpdesk if you would like verification that the attorneys were added correctly.
